

Curriculum Aspiration:

EXPRESSIVE ARTS AND DESIGN

Begin to use exploration tools to create a model using wood that shows breadth of skills and accuracy.

Milestone 1:

Children begin to explore a range of woodwork tools safely with close adult support, learning how to use equipment correctly and follow simple safety rules. They develop confidence in talking about their actions and creations using appropriate vocabulary.

Milestone 2:

Pupils increasingly select and use a small range of tools with greater independence, control, and awareness of safety, developing accuracy in tasks such as hammering, joining, and sanding. They begin to combine materials and techniques to create simple models, while starting to plan and adapt their ideas as they work.

Milestone 3:

Pupils confidently and safely select from a range of tools and materials, using multiple tools with increasing accuracy and control. They create purposeful wooden models using a variety of techniques and can evaluate their work, explaining their choices and process.
